

Dr. Cyrus Karkaria
President – Biotechnology

Dr. Cyrus Karkaria is the President of the Biotechnology division at Lupin and leads all of Lupin's efforts in evolving the company's capabilities in the segment. This includes global development of the Biosimilars portfolio. Dr. Karkaria is a veteran with over 25 years of experience in managing drug development and commercialisation of products across multiple markets including USA. Prior to joining Lupin, he was Vice President of Operations and Biopharmaceutical Process Sciences at Celldex Therapeutics & CuraGen in the US. He has worked with Biogen where he was involved in commercialization of their products. Dr. Karkaria also has experience in dealing with health regulators from US, EMEA, and Australia.

Dr. Karkaria earned an M.Sc in Biochemistry from Mumbai University followed by a PhD in Biochemistry from University of Maryland and a Post-Doc from Harvard Medical School.
