

Dr. Rajender Kamboj

*President – Novel Drug Discovery
& Development*

Dr. Kamboj leads Lupin's New Chemical Entity Research & Development. His experience spans across drug discovery, licensing products and technologies, business development, mergers and acquisitions and corporate development activities. He holds over 200 U.S. patents, covering new molecular entities, products, composition of matter, various therapeutic uses and use of human genes. He is the author/co-author of over 90 research articles in the biomedical field. His career spans more than 35 years in research including pharmaceutical industrial R&D.

Prior to Lupin, he was with Xenon Pharmaceuticals Inc., Vancouver, and NPS Allelix, Canada, where he was instrumental in taking these companies from the inception of the drug discovery group all the way to multiple licensing transactions and collaborations with Global MNCs such as Pfizer, Sanofi, Novartis, Eli Lilly, Roche, Amgen, Takeda, J&J etc.

Dr Kamboj is a PhD from the University of Adelaide, Australia.
