26. Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format

Sl. No.	Material identified issue	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Pollution	Risk	The manufacturing processes can result in the release of harmful chemicals and waste into the environment, contaminating air, water, and soil. This pollution not only endangers ecosystems but also has potential health implications for communities living nearby.	We are continuously identifying opportunities to effectively manage our environmental impact through pollution control measures. We are continuously monitoring our air emissions, GHG emissions wastewater generation. We are focusing on efficient water consumption, reducing water withdrawal and increasing water recovery. For waste management, we are focusing on increasing the share of recycling and reuse within our own operations, and co-processing of hazardous waste.	Negative Air and water contamination can lead to health and safety issues for surrounding communities, flora and fauna, and lead to adverse legal, regulatory and financial consequences, loss of reputation and stakeholder trust, ultimately leading to a loss of license to operate.
2	Water Management	Opportunity	By continuing high water consumption in areas of water stress, the risk of increase in operational costs continue to rise, this can lead to issues in manufacturing capabilities which can lead to an overall loss in revenue.	We have established targets to recycle water consumption by 50% by 2030. We have implemented Zero Liquid Discharge at 6 of our sites and treating any waste water produced during manufacturing. We are also taking steps for responsible use of water in areas of high water stress we aim to reduce the water burden.	Negative Increased water stress may affect nearby communities and productivity of manufacturing sites leading to regulatory and financial consequences.

Sl. No.	Material identified issue	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
3	Pharmaceuticals in environment/ Anti Microbial Resistance (AMR)	Risk	Inaction from Lupin as a pharma company towards AMR stewardship can lead to loss in reputation which in turn leads to loss in customer loyalty and customers.	We actively assess the ecological impact of the Active Pharmaceutical Ingredients (APIs) used in the manufacturing processes, discharge into water bodies, potential bioaccumulation in ecosystems, and overall toxicity to organisms. We frequently analyze the Anti Microbial contents in the treated water discharges and ensure that the PNEC values of those AMRs are below the limit of quantification. 6 out of 13 manufacturing plants are Zero Liquid discharge plants where in the treated effluent is recycled in the utilities and there is no discharge outside the premises. Additionally, we are undertaking life cycle assessments of Top-10 revenue generating products across the value chain to understand the cumulative environmental impact of APIs in the cradle to gate approach. The life cycle assessments will help us to assess the opportunities for reducing the ecological footprint.	Negative AMR can leads to higher mortality rates as infections that were once treatable become resistant to antibiotics, making them harder to cure, resulting in prolonged illnesses and increased complications. Resistant bacteria can spread within communities and healthcare settings, leading to outbreaks that are difficult to control.
4	Waste Minimization	Risk	Directing more waste to landfills and incinerators will increase the company's contribution to air pollution and GHG emissions, along with underground water eutrophication.	Our approach to waste management is guided by the 3R principle of 'Reduce, Reuse and Recycle. Our waste streams, which include hazardous waste, non-hazardous waste, e-waste, biomedical waste, and others, are inventoried periodically and are sent to third parties for recycling/disposal in compliance with applicable government regulations.	Negative Improper waste management can lead to material wastage, fines and compliance penalties.
5	Green Chemistry	Opportunity	Investing in green chemistry and inculcating sustainable manufacturing processes can lead to an optimized and efficient manufacturing process. This can have a positive impact on revenues and in turn help increase investments in better tools and technologies.		Positive By bringing down product carbon and water footprints, reducing use of hazardous chemicals and solvents and replacing them with renewable green solvents and feedstocks, we stand to benefit both environmentally and economically.
6	Customer Health and Safety	Opportunity	By providing safe and effective drugs the brand loyalty amongst customers increases and leads to greater revenues and builds trust between the company and society.		Positive Propagating customer safety initiatives builds trust with customers, lowers healthcare costs and positively impacts revenue.
7	Occupational Health and Safety	Risk	Providing for a safe work environment brings about high levels of employee satisfaction and ensures that they can achieve their highest potential. Ineffective management of health and safety practices can lead to a high number of safety related incidents. An unsafe workplace can cause distress and has potential reputational & revenue loss for the organization.	All our sites are ISO18001 certified and have management systems in place for avoiding unsafe incidents. Regular training is given to all site teams to mitigate unsafe acts and report on unsafe incidents. Employees are encouraged to report on near misses and potential near misses to avoid any future incidents. Industrial hygiene & personnel safety standards are maintained as per global best practices to keep the workplace safe. Our record state that our incident rate & accident rate are reducing YoY in line with our commitment for the same.	Positive Having a robust strategy to ensure occupational health and safety will lead to higher employee productivity along with higher retention rates.

Sl. No.	Material identified issue	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
8	Human Rights	Risk	Without proper safeguards for employee human rights protections, the company will lose reputation and credibility in the market and see a drastic drop in revenues.	We have established policies and safeguards to ensure the protection of human rights for each of our employee's and workers, our code of conduct outlines Lupin's stance on the protection of human rights and actions and redressals that are available to our employee's in case they feel like their human rights have been infringed.	Negative Violation of human rights has a significant impact on the company's credibility and can lead to harsh penalties, litigation and have a significant dent on stakeholder confidence.
9	Human Capital Development	Opportunity	By providing training and flexibility in work methods to employee's the company will see growth in all facets. This will have a positive contribution to revenues and credibility of the company within the pharma market.		Positive By developing resources, the company can lower hiring costs, and generate more internal mobility.
10	Product Accessibility and Affordability	Opportunity	By extending our scope of access to high disease burden nations, we can build positive trust within society. It also leads to greater opportunities for developing supply chains in untapped markets while increasing credibility amongst our stakeholders.		Positive Product innovation and research efforts enhance the brand value by offering a wide range of products that are both easily accessible and reasonably priced. These products enable us to cater to unmet patient needs and also facilitates access for low and middle income countries.
11	Responsible Supply Chain Management	Opportunity	Having a responsible supply chain leads to lower costs in maintaining long term partners and an overall increase in revenue due to a more robust flow of products.		Positive By responsible supply chain practices the company is ready to deal with supply chain disruptions brought on by unprecedented circumstances. In addition, the Company's adherence to its responsible sourcing enhances its social and environmental performance.
12	Compliance (Regulatory & Ethical)	Opportunity	By inculcating industry best practices and creating a governance structure around compliance ensures that the company's credibility remains intact.		Positive By following best practices and ensuring compliance, the company avoids fines and builds trust with customers and within stakeholders.
13	Business Ethics: Anti-bribery and corruption	Opportunity	Ensuring that governance practices and policies are in place to maintain ethical business conduct and minimise conflicts of interest can lead to the company expanding business in new markets and having a positive compliance portfolio.		Positive Having robust governance strategies and policies drives compliance and ensures the good standing of the company.
14	Data Privacy and Protection	Risk	Information protection risks have become more critical due to the shift to remote work driven by the COVID-19 pandemic. The increased reliance on digital communication and data sharing has heightened the company's exposure to cyber threats.	We are ISO 27001 certified and conduct regular checks of our data. We also provide employee's and workers with extensive training on the handling and use of company data to ensure maximum protection.	Negative An attack on Lupin's IT systems or failure to comply with data privacy laws can lead to the loss of vital business intelligence, financial setbacks, and reputational damage.

Sl. No.	Material identified issue	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
15	Ethical Marketing and Product Labeling	Risk	Miscommunicating drug uses or prescriptions along with any incorrect labeling can cause serious harm to patients health and safety, which has reputational risks alongside risks related to loss in revenues.	By having a ethical marketing policy, audits and unique identifiers we ensure the company and its partners are able to identify any miscommunication of usages for drugs produced by the company.	Negative Miscommunication and improper labelling of product use can lead to customer health and safety issues and fines.
16	Combatting Counterfeit Medicines	Opportunity	By ensuring traceability and authenticity of the drug we can create a strong impression in the market as overseers. This leads to a boost in the company's credibility.		Positive Curtailing the distribution counterfeit medicines ensures accountability and avoids product recall costs.
17	Risk Management And Business Continuity	Opportunity	A robust risk management and Business Continuity plan will uphold credibility and trust in the company's long term compliance portfolio.		Positive This ensures that the company does not incur compliance related penalties.

4. Does the entity have an anti-corruption or anti-bribery policy? If yes, provide details in brief and if available, provide a web-link to the policy.

The Company does not have a separate anti-bribery and corruption policy, but its code of conduct emphasizes a commitment to combating bribery and corruption. This commitment extends to all subsidiaries, associates, and business partners. Lupin unequivocally prohibits any instances of bribery and corruption in its operations, striving to conduct business in an ethical and transparent manner. Various internal controls, such as audits, internal reviews, a ban on political contributions, regular compliance checks, and a whistleblower policy, are in place to prevent unethical behavior by the company or its employees. Lupin fosters a culture of thorough deliberation, transparency, and fairness in its interactions with stakeholders and the public. This policy is an integral part of the Code of Business Conduct and Ethics, applicable to all employees, senior management, and the board of directors. It is publicly accessible on the company's website at <https://www.lupin.com/investors/code-of-conduct/>.

2. Does the entity have processes in place to avoid/ manage conflict of interests involving members of the Board? (Yes/No) If Yes, provide details of the same.

Yes, Lupin has clearly defined policies and the Code of Conduct outlines how conflict of interest should be managed. These policies are communicated to all board members and regularly reviewed and updated as needed. Board members are required to disclose any potential conflicts of interest, such as financial interests in a company doing business with the organization, relationships with vendors, or personal interests that may conflict with the organization's interest.

PRINCIPLE 2

Businesses should provide goods and services in a manner that is sustainable and safe

Essential Indicators

1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

Particulars	FY 2023-24	FY 2022-23	Details of improvements in environmental social impacts

Capex	₹ 776 million	₹ 136 million	

2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Yes

b. If yes, what percentage of inputs were sourced sustainably?

The Company has implemented appropriate measures to ensure sustainable sourcing practices. Desk-based screening has been completed for 309 Tier 1 suppliers. Within its Third Party Code of Conduct, Lupin mandates that all business partners adhere to fundamental sustainability criteria encompassing labor rights, health and safety standards, environmental considerations, ethical behavior, data privacy, and more. Lupin has classified its suppliers into categories such as Strategic, Critical, Leverage, and Routine, and regularly evaluates them to identify, minimize, and address risks effectively.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

We have established appropriate waste management systems across all our facilities. Our waste disposal processes adhere to local regulations and prioritize minimizing the amount of waste sent to landfills.

Waste type	Waste management procedure in place
Plastic (including packaging)	Either co-processed or recycled based on the type of waste generated.
E-waste	Sold to authorized recyclers for safe disposal.
Hazardous waste	Sent to authorized recyclers/Pre-processor/cement industries for co-processing or to the TSDF site.
Other waste (wastepaper and paper products)	Sent to authorized recyclers Ash generated from agro waste boilers is sent to brick manufacturers/landfill.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

As part of our responsibilities under Extended Producer Responsibility, we recycle a corresponding amount of post-consumer plastic waste generated by our products in India. This recycled plastic is either used to create new products or serves as an alternative energy source. Additionally, we have transitioned from physical patient information leaflets to digital formats, not only cutting costs but also reducing paper usage and waste. In FY23, we successfully met our EPR objective, achieving a 100% completion rate by collecting and directing 1,956 metric tons of plastic waste to processing facilities.

Leadership Indicators

1. Has the entity conducted Life Cycle Perspective/Assessments (LCA) for any of its products (for manufacturing industry) or for its services (for service industry)? If yes, provide details in the following format?

NIC Code	Name of Product/Service	% of total Turnover contributed	Boundary for which the Life Cycle Perspective / Assessment was conducted	Whether conducted by independent external agency (Yes/No)	Results communicated in public domain (Yes/No) If yes, provide the web-link.
	Albuterol	3.4%	Cradle to gate	Yes	Confidential
	Lisinopril	0.2%	Cradle to gate	Yes	Confidential
	GLUCONORM	3.1%	Cradle to gate	Yes	Confidential
	Cefaclor	2.4%	Cradle to gate	Yes	Confidential

2. If there are any significant social or environmental concerns and/or risks arising from production or disposal of your products/ services, as identified in the Life Cycle Perspective / Assessments (LCA) or through any other means, briefly describe the same along-with action taken to mitigate the same.

Name of Product/Service	Description of the risk/concern	Action Taken
Lisinopril	Acidification, Mineral & Fossil Resource Depletion, Ecotoxicity (Freshwater), Eutrophication (Terrestrial, Freshwater, Marine), Photochemical Ozone Formation	We are in the process of adopting SBTi based approach to develop the decarbonisation strategy of our value chain.
Levetiracetam	Ozone depletion	
7ACCA	Water Resource Depletion	

3. Percentage of recycled or reused input material to total material (by value) used in production (for manufacturing industry) or providing services (for service industry).

The nature of the Company's business, being the production of pharmaceutical goods intended for human consumption, precludes the utilization of any re-used or recycled input materials in its production processes or product packaging. This arises from the critical imperative to ensure consumer safety and comply with applicable current Good Manufacturing Practices (cGMP) mandated by regulatory bodies.

4. Of the products and packaging reclaimed at end of life of products, amount (in metric tonnes) reused, recycled, and safely disposed, as per the following format:

As part of our commitment to Extended Producer Responsibility regarding the management of post-consumer plastic waste, we are ensuring the recovery of a quantity of post-consumer plastic waste equivalent to what our products produce in India. This plastic waste is then directed towards the creation of recycled products or used as an alternative source of energy. Moreover, we have digitized patient information leaflets, removing them from our products. This step has not only cut costs but also decreased paper usage and waste.

Particulars	FY 2024			FY 2023		
	Re-Used	Recycled	Safely Disposed	Re-Used	Recycled	Safely Disposed
Plastics (including packaging)	0	0	2803MT	0	0	1956MT

We have implemented health and safety management systems in all our facilities and all our sites are ISO 45001 certified.

- b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?**

Health and safety at Lupin are overseen by our Environmental, Health, Safety, and Sustainability (EHS&S) team, who develop and implement the relevant policies, procedures, and programs at all our locations. We employ a well-defined Hazard Identification and Risk Assessment (HIRA) system to evaluate the risks linked with our product activities and services, enabling a methodical approach to risk assessment and prioritization for mitigation. Furthermore, we carry out specific risk assessments such as HAZOP for Active Pharmaceutical Ingredient (API) products and processes, alongside Risk Assessments for Formulation Units and daily Job Safety Analysis, to gain a thorough understanding of potential hazards. All our health and safety frameworks are rigorously audited, both internally and externally.

- c. Whether you have processes for workers to report the work related hazards and to remove themselves from such risks. (Y/N)**

Yes, we provide mechanisms for employees and workers to report any work-related hazards or dangerous situations. Individuals can report near misses, injuries, and incidents to their department heads. We have a specialized safety team responsible for conducting root cause analysis of any incidents and implementing preventive actions to avoid recurrence. For emergency situations, the team verifies that all mitigation strategies are operational through mock drills. Additionally, we take proactive measures to ensure rapid access to medical services, including the provision of ambulances and the availability of antidotes.

- d. Do the employees/workers of the entity have access to non-occupational medical and healthcare services? (Yes/No)**

Yes, the company's employees have access to medical and healthcare services for non-work-related conditions. Each department is equipped with first aid kits for minor injuries or ailments unrelated to work. Additionally, eligible employees and workers receive benefits under the Employees' State Insurance Act, which offers protection in cases of employment-related injuries, illnesses, or maternity issues. Employees also have access to medical and health insurance, applicable to their specific situation, which can be utilized for hospital admissions due to certain injuries.

Leadership Indicators

- 1. Provide the processes for consultation between stakeholders and the Board on economic, environmental, and social topics or if consultation is delegated, how is feedback from such consultations provided to the Board.**

Maintaining consistent and proactive communication with essential stakeholders is crucial for effectively sharing our strategies and results. We actively engage in and promote open and positive discussions with our stakeholders to better understand their needs, expectations, and objectives, ensuring these factors are considered in all our decision-making processes. We have determined and prioritized key issues based on their significance to our stakeholders and our business operations. Our Environmental, Social, and Governance (ESG) central committee gathers monthly to analyze the feedback collected from these engagements.

- 2. Whether stakeholder consultation is used to support the identification and management of environmental, and social topics (Yes/No). If so, provide details of instances as to how the inputs received from stakeholders on these topics were incorporated into policies and activities of the entity.**

Yes. The double materiality assessment that we conducted allowed us to evaluate our stakeholder's perspectives on our societal and environmental impacts, as well as the potential effects of external events on our business. We conducted meetings with management to shortlist topics and then rolled out the materiality assessment questionnaire of 30 material topics to over 550 external and 200 internal stakeholders. The evaluation helped us identify potential vulnerabilities that could affect our ability to deliver medicines and treatments, while also enabling the company to manage its impacts and understand stakeholder perceptions better.

- 3. Provide details of instances of engagement with, and actions taken to, address the concerns of vulnerable/marginalized stakeholder groups.**

Dr. Desh Bandhu Gupta established the foundation to serve the poor and needy, outreaching some of the neediest and most excluded geographies in India. Over the last three decades, foundation has worked with 5,431 villages across nine states in India, positively impacting the lives of over twelve lakh families.

The year was a landmark year for the foundation, as it made a strategic shift from implementing holistic rural development to two structured pivotal programmes as Lives and Livelihoods. The programs focus on implementing outcome-oriented projects, serving the poor and needy, enabling better livelihoods, access to health care services, quality of lives and well-being in the long term.

4. Do you have a focal point (Individual/ Committee) responsible for addressing human rights impacts or issues caused or contributed to by the business? (Yes/No)

At Lupin, adhering to and promoting human rights form the foundation of our corporate conduct. We are committed to protecting human rights and eliminating practices like forced labor, child labor, and modern slavery within our operations. To maintain a consistent focus on the protection of human rights, including the prevention of human trafficking, forced labor, child labor, and discrimination, we've established an extensive Human Rights Policy. In our operations in India, we have designated 93 employees as Trainers and Lead Implementers for Human Rights. These individuals act as champions for human rights, ensuring the thorough application of our policies within their specific areas or functions.

5. Describe the internal mechanisms in place to redress grievances related to human rights issues.

The Company adheres to uncompromising integrity in conduct of business and has zero tolerance for corrupt and immoral practices. The Company's operations are guided by strong control systems which are reviewed regularly by internal and external auditors. Code of Conduct, Whistleblower Policy and Prevention of Workplace Harassment and initiatives on creating awareness of sexual harassment at workplace, empower employees to report unethical practices. Specified mechanisms have been set up to deal with workplace harassments and facilitate their swift redressal. Employees can raise their concerns to the Office of Ombudsperson about potential issues concerning fraudulent business practices, unethical behaviour, discriminating or gender-biased misconduct and violation of the Company's policies or CODE. No person has been denied access to the Chairperson of the Audit Committee. Teams of strategic business unit heads/officers appointed by the Ombudsperson are engaged by the Ethics and Compliance office, for resolution of reported cases in accordance with the Whistleblower Policy. During the year, all cases of sexual harassment that were reported were investigated and resolved by the Internal Complaints Committee within the specified turnaround time as per the Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013.

6. Number of Complaints on the following made by employees and workers:

Particulars	FY 2023-24			FY 2022-23		
	Filed	Pending	Remarks	Filed	Pending	Remarks
Sexual Harassment	4	0	Nil	3	0	Nil
Discrimination at workplace	0	0	Nil	2	0	Nil

Total Complaints reported under Sexual Harassment on of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013 (POSH)	4	3
Complaints on POSH as a % of female employees/workers	0.4%	0.32%
Complaints on POSH upheld	3	Not Applicable

8. Mechanisms to prevent adverse consequences to the complainant in discrimination and harassment cases.

Our organization firmly upholds a zero-tolerance stance against all forms of discrimination, including but not limited to sexual discrimination. We strongly urge our employees, contractors, and suppliers to come forward and report any occurrences of discriminatory behavior they encounter. All reported incidents are addressed promptly and efficiently, with appropriate measures taken to ensure that our environment remains inclusive and respectful for everyone. We have also conducted independent third party assessment audits for the Company's Human Rights Policy with zero findings on the discrimination or harassment cases in FY24 across Pan India Lupin Locations.

9. Do human rights requirements form part of your business agreements and contracts? (Yes/No)

Yes

10. Assessments for the year:

Particulars	% of your plants and offices that were assessed (by entity or statutory authorities or third parties)
Child labour	100%
Forced/involuntary labour	100%
Sexual harassment	100%
Discrimination at workplace	100%
Wages	100%
Others – please specify	NA

11. Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 10 above.

Tier 1 Strategic suppliers identified by Procurement teams, are scheduled to be sensitized and trained on the Lupin's Human Rights Policy in FY25.

Leadership Indicators

1. Details of a business process being modified / introduced as a result of addressing human rights grievances/complaints.

Process Improvement in the vendor billing cycle: One of the observations from the location wise Human Rights audit was that, though the third party employees deployed by the manpower contractors were paying their employees well within the stipulated period, the day of the month varied across vendors. Since the permanent employees of the company were being paid on the last day of the month, it posed a risk wherein the third party employees would feel unfairly discriminated against, inspite of complying to all statutory norms of the land. Therefore, it was decided that as a proactive step, the day of payout for the third party employees also needed to be brought forward and made uniform across all vendors to the extent possible.

A cross functional team of HR location leads, administration, financial shared services as well as procurement team was formed. This team worked towards ensuring the agreements with the manpower contractors were re-evaluated with a softer credit period as well as a priority payout partner on a monthly basis. The SOPs prepared by the team were presented to the leaders of these functions and signed off and implemented. This ensured the standardization of the payment date for the vendors and thereby for the third party contractual employees. This led to an improvement in engagement of these people across the India locations.

2. Details of the scope and coverage of any Human rights due-diligence conducted.

Scope: Human Rights Management as per Internal Policy of Lupin Limited and Applicable Compliance Requirements

Coverage: All Lupin Limited Manufacturing sites across India, Shared Services Office Airoli and Corporate Office, Kalpataru, Mumbai, LMSL & LDL (NRL-National Reference Lab) Turbhe.

3. Is the premise/office of the entity accessible to differently abled visitors, as per the requirements of the Rights of Persons with Disabilities Act, 2016?

Yes

4. Details on assessment of value chain partners:

Particulars	% of value chain partners (by value of business done with such partners) that were assessed
Sexual Harassment	100% of strategic and critical material suppliers
Discrimination at workplace	100% of strategic and critical material suppliers
Child Labour	100% of strategic and critical material suppliers
Forced Labour/Involuntary Labour	100% of strategic and critical material suppliers
Wages	100% of strategic and critical material suppliers
Others – please specify	Not Applicable

5. Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 4 above.

Not Applicable

PRINCIPLE 6:

Businesses should respect and make efforts to protect and restore the environment

Essential Indicators

1. Details of total energy consumption (in Joules or multiples) and energy intensity, in the following format:

Parameter	FY 2023-24	FY 2022-23
From renewable sources		
Total electricity consumption (A)	146,730 GJ	39,868 GJ
Total fuel consumption (B)	487,713 GJ	106,806 GJ

Total energy consumed from non-renewable sources (D+E+F)	2,764,446 GJ	2,505,283 GJ
Total energy consumed (A+B+C+D+E+F)	2,769,956 GJ	2,651,957 GJ
Energy intensity per rupee of turnover (Total energy consumed/Revenue from operations)	18.89 GJ/INR Mn	23.55 GJ/INR Mn
Energy intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total energy consumed/Revenue from operations adjusted for PPP)	432.16 GJ/Mn International Dollar	538.97 GJ/Mn International Dollar
Energy intensity in terms of physical output		
Energy intensity (optional) – the relevant metric may be selected by the entity		

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

2. Does the entity have any sites / facilities identified as designated consumers (DCs) under the Performance, Achieve and Trade (PAT) Scheme of the Government of India? (Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken, if any.

Not Applicable

3. Provide details of the following disclosures related to water, in the following format:

Parameter	FY 2023-24	FY 2022-23
Water withdrawal by source (in kilolitres)		
(i) Surface water	135,185 KL	135,146 KL
(ii) Groundwater	149,551 KL	161,832 KL
(iii) Third party water	1,336,731 KL	1,270,912 KL
(iv) Seawater/desalinated water	-	-

Total volume of water withdrawal (in kilolitres) (i + ii + iii + iv + v)	1,621,467 KL	1,567,890 KL
Total volume of water consumption (in kilolitres)	1,584,941 KL	1,551,013 KL
Water intensity per rupee of turnover (Total water consumption/Revenue from operations)	11.07 KL/INR Mn	13.78 KL/INR Mn
Water intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total water consumption/Revenue from operations adjusted for PPP)	253.30 KL/Mn International Dollar	315.22 KL/Mn International Dollar
Water intensity in terms of physical output		
Water intensity (optional) – the relevant metric may be selected by the entity		

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

4. Provide the following details related to water discharged:

Parameter	FY 2023-24	FY 2022-23
Water discharge by destination and level of treatment (in kilolitres)		
(i) To Surface water		
- No treatment	-	-
- With treatment – please specify level of treatment	-	-
(ii) To Groundwater		
- No treatment	-	-

- With treatment – Discharge to CETP	36,526	16,877
(v) Others		
- No treatment	-	-
- With treatment – please specify level of treatment	-	-
Total water discharged (in kilolitres)	36,526	16,877

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.

We've put into place technologies and systems at six of our manufacturing facilities to attain Zero Liquid Discharge (ZLD) standards. This measure prevents any effluents generated by our operations from being released into natural water bodies. Additionally, we're in the process of obtaining ZLD certification for our other sites.

6. Please provide details of air emissions (other than GHG emissions) by the entity, in the following format:

Parameter	Please specify unit	FY 2023-24	FY 2022-23
NOx	tonnes/annum	152.51	232.42
SOx	tonnes/annum	166.16	206.03

Persistent organic pollutants (POP)	tonnes/annum	-	-
Volatile organic compounds (VOC)	tonnes/annum	-	-
Hazardous air pollutants (HAP)	tonnes/annum	-	-
Others – please specify	tonnes/annum	-	-

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

N/A

7. Provide details of greenhouse gas emissions (Scope 1 and Scope 2 emissions) & its intensity, in the following format:

Parameter	Unit	FY 2023-24	FY 2022-23
Total Scope 1 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Total CO ₂ CH ₄ N ₂ O Metric tonnes of CO ₂ equivalent	61,474	86,910
Total Scope 2 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Total CO ₂ CH ₄ N ₂ O Metric tonnes of CO ₂ equivalent	263,905	323,845
Total Scope 1 and Scope 2 emission intensity per rupee of turnover (Total Scope 1 and Scope 2 GHG emissions / Revenue from operations)		2.27 tCO ₂ e/INR Mn	3.65 tCO ₂ e/INR Mn
Total Scope 1 and Scope 2 emission intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total Scope 1 and Scope 2 GHG emissions/ Revenue from operations adjusted for PPP)		52 tCO ₂ e/Mn International Dollars	83.48 tCO ₂ e/Mn International Dollars
Total Scope 1 and Scope 2 emission intensity in terms of physical output			
Total Scope 1 and Scope 2 emission intensity (optional) – the relevant metric may be selected by the entity			

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

8. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

At Lupin, we have taken various initiatives to reduce the emission of GHG emissions from our operations, including procurement of renewable energy, switching to cleaner use of fuels, replacing conventional lights with LED, installation of variable frequency drives (VFDs), etc.

We have also adopted science based target to reduce our absolute Scope 1 and Scope 2 GHG emissions by 38% by 2030. Our GHG emission reduction initiatives include:

1. We have increased our renewable energy contribution by 3.71 MW at Ankleshwar and 1.58 MW at Dabhasa, reducing 34,688 tonnes of CO₂ emissions.
2. We have commissioned rooftop solar panels of 0.52 MW capacity in FY23-24, and installation of additional 1.83 MW is in progress.
3. We have introduced electronically commutated (EC) motors at Pithampur and Aurangabad facilities, which has significantly reduced power consumption by 0.5 MU per annum. We plan to implement EC motors at Lupin Biotech, Lupin Research Park, Sikkim, and Nagpur for further energy reduction.
4. We are commissioning Biomass briquette boilers and installation of bag filters & electrostatic precipitators (ESP) at multiple locations for energy optimization and reduction of particulate matters in flue gas.
5. We have initiated scope 3 inventorization and calculated emissions for 8 categories including Purchased Goods and Services, Capital Goods, Fuel and Energy, Waste Generated and Disposed, Upstream Transport, Downstream Transport, Business Travel, and Employee Commute.
6. We have successfully implemented Microsoft Cloud Based Technologies across our various sites and offices. By leveraging these technologies, we have achieved operational efficiency and reduced approximately 27 tCO₂e emissions across our operations. Corporate Overview Statutory Reports Financial Statements 255
7. We have installed advanced chillers and condensers in our manufacturing plants to improve the effectiveness of recovery and further reduce utility costs.
8. We are transitioning to Low Sulphur Heavy Stock (LSHS) as boiler fuel at our 4 facilities resulting in a significant reduction in steam costs and GHG emissions.
9. We are implementing efficient equipment, such as finned tube condensers, dry vacuum pumps, nano-filtration, and heat integration systems.
10. We have replaced AC motors with DC electronically commutated motors in AHUs, which has resulted in energy efficiency and power cost savings.
11. Our manufacturing facility in Mandideep, India has been awarded the "GOLD LEED".
12. Our commitment to climate stewardship also contributes to product innovation in the development phase. Lupin Healthcare UK' product, Luforbec, has recently achieved Carbon neutrality certification. Lupin Healthcare offsets the total emissions from the inhaler's production, use and disposal, thus achieving carbon neutrality

9. Provide details related to waste management by the entity, in the following format:

Parameter	FY 2023-24	FY 2022-23
Total Waste generated (in metric tonnes)		
Plastic waste (A)	2,803	1,956

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

Across our full value chain, we have adopted efficient waste management practices and embraced circularity. We focus on recycling waste and are committed to minimizing the amount of waste sent to landfills and incinerators. Out of our thirteen facilities, including those dedicated to research and development, seven send their incinerable hazardous waste to Co-processors or Pre-processors. In FY2024, we managed to send 89% of our incinerable hazardous waste to be co-processed. By the year 2030, our goal is to redirect 70% of the incinerable hazardous waste generated by our operations in India to co-processing facilities like cement plants.

The spent solvents produced in the process of manufacturing Active Pharmaceutical Ingredients (APIs) are either reused on-site or sent to certified disposal facilities or recyclers. In our efforts to conserve resources, used calcium sulphate is dispatched to cement factories to serve as both a raw material and an alternative fuel. Non-hazardous waste, including waste from our canteens and mycelia, is processed either into organic fertilizer through composting or sent to piggeries.

Our commitment to waste reduction is evident through several initiatives:

- Encouraging the use of non-hazardous and less toxic materials at the R&D phase or as part of our process enhancements.
- Enhancing our processes to increase product yields, thereby reducing waste.
- Providing training for our employees on the safe handling, labeling, and storage of hazardous substances.

11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals/clearances are required, please specify details in the following format:

Sl. No.	Location of operations/offices	Type of operations	Whether the conditions of environmental approval/clearance are being complied with? (Y/N) If no, the reasons thereof and corrective action taken, if any.
